FUNCTIONAL

WORKBOOK 01/2015

EQUIPMENT FOR THE FITTEST,

This is our goal! Xenios USA® is a company focus on development, production and marketing of professional workout tools for those who like to play with the Sport of Fitness: Crossfit®, Functional Training, Weight Lifting, Power Lifting, Strength and Conditioning are just some of field our products are employed in.

The road to the fittest is made of heavy duty workouts and so the equipment needs to be able to bear such kind of severe training sessions.

Xenios USA® was born on 2009, gathering all the ideas, training methods, trends, and new ways of the worldwide workout markets: learning from the legacy of gym training and surfing the new wave of the Functional Training and Performance Training methods. Xenios USA® hired a team of experienced master trainers, biomechanical engineers, product managers, and marketing managers in order to build and then keep updated a full range of products that could really match the new workout trends.

Xenios USA® products were originally developed, and so they keep being developed, by a joint venture team of American and Italian product designers.

The Xenios USA® main mission is headed to provide as more as possible reliable tools to those who need to really stress them without having to fight with faults and breakages of the equipment.

All Xenios USA® products are drawn, tested and then manufactured by Xenios USA®. The process to let an idea come true, is strictly ruled by highest standards of product quality. Each mass production batch is made under a close quality control and all products that can't match the Xenios USA® requirements are rejected.

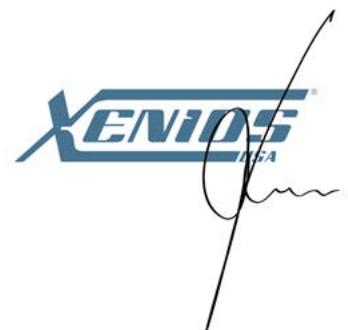

All raw materials and production processes, like steel welding and bending or steel coating are made according to the Xenios USA® data sheets and most of the times they need to match over-the-standard parameters.

Most of the Xenios USA® products are furthermore tested and certified by experts of products safety, like, for example the TUV-SUD® that was chosen to test all the XRIG™ products.

At Xenios USA® we believe in the future of the Sport of Fitness: we believe most of people will sooner or later approach the Functional Training classes, falling in love with the incredible performance goals that can be achieved. That is the reason we keep investing all of our time and efforts by the research and development of new training tools able to satisfy from time to time new Coaches' needs.

We are proud to have been chosen by many Affiliate Owners as their equipment source and we are furthermore proud to equip some of the most famous Throw Down Contest. Both help us to learn either from the daily use of our products and from their behavior while stressed by professional athletes. Our challenge keep going on day by day.

Stay tuned with us and the Sport of Fitness!

CrossFit® is a registered trademark of Crossfit Inc.(USA). The Xenios USA company and registered trademarks are not affiliated and/or associated with and/or endorsed and/or sponsored by Crossfit Inc. The Xenios USA products and services are not endorsed, tested, sponsored by and/or associated with Crossfit Inc. and/or with any of the registered trademarks, products and services of Crossfit Inc.

MORE THAN A WORKOUT TOOL

At Xenios USA® we couldn't consider our mission accomplished by just developing and manufacturing high-end workout tools. Since we operate within a brand-new kind of sport market, we have thought to those who are new to these markets as well, and so those who need to be supported at the beginning, or, even all along their path. Xenios USA® consultant services were thought as a value-added of Xenios USA® products and they can be purchased either as an add-on for a first installation order, or while an Affiliate Box business is already running. Ask any further to the Xenios USA® Team.

R2B it stands for "Road to the Box". It is a kind of training course for those who are going to become an Affiliate owner or manager. Most of Coaches or Athletes who want to switch their sport passion in to a business opportunity, stuck at the entrance door of the business: how to set the business up? What are the main rules to be followed? How to draft a business plan to know when I will start earning? How to lay down the equipment within the layout of the floor? What's the perfect list of equipment I may need? What else? Am I sure to be ready to organize and to schedule the classes? These are just some of the questions we are going to answer at, thru the R2B program. R2B is a program developed and managed by an experienced team of Coaches and Box owners outsourced by Xenios USA.*

XENIOS USA ACADEMY the Academy of Xenios USA® was born as a kind of container of specialty workshops held by professional coaches. The Academy doesn't aim to be a school or a certified workout method, but just a gateway for coaches and athletes, to participate to workshops thought to deepen several workout subjects and aspects: Weightlifting and Powerlifting techniques, Kettlebell training, Clubbell® training, mobility and rehab, advanced gymnastic movements, are just some of the topics the Xenios USA® Academy seminars will carry on. The Xenios USA® Academy calendar and team of coaches may change from Country to Country and all the seminars' venues are selected just among the full-equipped Xenios USA® Flagship Workout sites. Stay tuned with our social media to keep being informed about dates to be saved!

BOX BUILDING When an Affiliate Box is about to be set-up, one of the heaviest lorry to bear for the new owner is just the first installation of all the purchased workout tools, stations and facility outfitting. At Xenios USA® we have built a team of experienced workers that could be hired by our clients in order to provide them a ground-up installation. By purchasing the "Box Building" service (where available), the Xenios USA's clients could be assisted on items unpacking, floor laying, Rig and Rack mounting and more, up to the rubbish collection and disposal while all job will be done. The "Box Building" could be purchased as an add-on of a Xenios USA® full-equipped Box order and prices may vary according to the several options the customers could tick in or out.

FLAGSHIP BOX at Xenios USA® we believe that those who really want to trust our brand and products, need to have the chance to be more than a client. So we have thought to the Xenios USA® Flagship contract: if you really intend to full-equip your Box with all Xenios USA® gear, from ground up, we can provide you a special package, made of products, services and advantages, that we use to call "really all-inclusive". The whole lay-out of your Affiliate will be thought and drawn by our designers and it will be fully decorated with our brand image. Flagships will be just few per each Country. They will need to match some facility requirements and they will be a kind of special team of Boxes where new items will be tested, or where workshops of the Xenios USA Academy will be held, or where tools will be always kept updated. The Xenios USA® Flagship program was thought to offer our best to those who really want to be Xenios USA®.

Attention: some of the above services may not be available within some Countries.

FLAGSHIP PROGRAM

WE REALLY CONCERN ABOUT SAFETY

At Xenios USA® we believe that a good and powerful marketing is not the only way to let a workout tool be really trustable, durable and safe. A serious and as longer as possible products' warranty chart is one more evidence to let clients believe, but it is not yet the ultimate key-point. At Xenios USA® we develop and draw our products by ourselves, we always work by prototypes that need to be tested in order to confirm that an idea can be really come true and so goes in to a mass-manufacturing process. We seriously control the quality of the production processes and the finished goods, by rejecting all items that can't match our high quality requirements. We care about packaging and carrying. We listen to all after-sales claims and we take all clients reports in serious consideration: customers' feed-back is the best way to make all products fitting the true needs of those who buy and use them.

So, what else? The Certifications: at Xenios USA® we like to overstress our products and we also like to let professionals of products' safety to do it. We like our quality to be also tested by third-parts. Furthermore, we do not just follow the rules about products' safety. We like to go beyond in testing, and to be able to give to our clients a really safe and severe tested range of products. A tested and certified product is not just a good purchase that could last as longer as possible, or bear severe workouts. A tested product can be also a kind of insurance for those who are going to be an owner or a manager of an Affiliate, a Gym, a Training Center. Headache-less products could be the right way to offer to members a safe workout environment.

TUV-SUD: most of our products (such as benches, racks, Crossfit® stations etc..) are tested and certified by the TUV-SUD®, that is one of the worldwide most affordable product testing company. All products are tested in order to comply with the latest products safety regulations (E.G: in Europe the EN-ISO 20957-1, EN-ISO 957-2 and EN-ISO 957-4)*. All along the catalogue we have mentioned which products are tested according to TUV-SUD® safety specs.

We furthermore care about the safety of the electronic products we carry. Either for the Xenios USA® items and for any third-brand product, we make sure they feature all needed certification, such as, for example, the CE and the ROHS ones*.

In order to make really reliable products, we also concern about safety and quality certifications of raw materials (such as, for example, the steel tubes used to make the whole XRIG™ range of items), painting and coating materials and processes, hardware, welding process and welder's certified skills. A product making process involve dozens of matters, from raw materials selection up to the packaging of the

finished goods, and our R&D and Product Team is just formed by experienced technicians and engineers that can let us be proud to label a workout tool with our logo.

**Some of the mentioned products' safety regulations and/or safety marks may not be valid for some Countries.*

CrossFit® is a registered trademark of Crossfit Inc.(USA). The Xenios USA company and registered trademarks are not affiliated and/or associated with and/or endorsed and/or sponsored by Crossfit Inc. The Xenios USA products and services are not endorsed, tested, sponsored by and/or associated with Crossfit Inc. and/or with any of the registered trademarks, products and services of Crossfit Inc.

At Xenios USA® we have thought to those who really need to face severe workout. The Magnum™ series was born as a kind of next-level version of some of the items commonly employed within heavy duty WOD.

Our R&D team has oversized some of our tools in order to switch them in to a tank-like series. Any of those products is headed to the Strongmen or to the Boxes where big guys are working out. Magnum™ products are almost unbreakable.

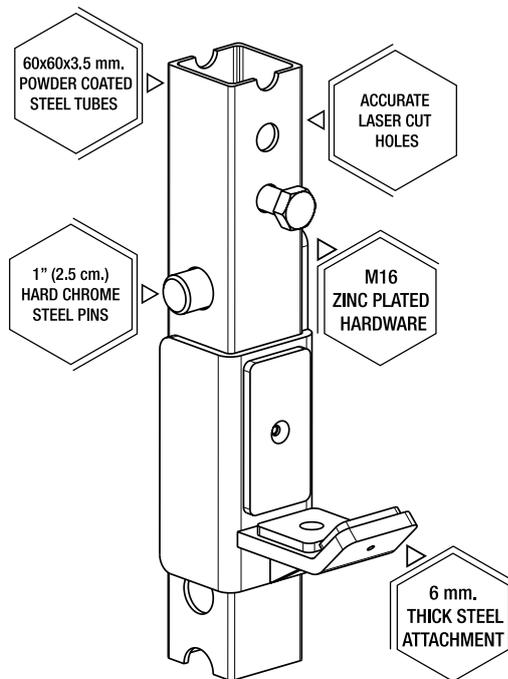

At Xenios USA® we have thought to the best way to let some products be also manufactured following a kind of next-level bill of specifications. There are some workout tools, such as the Squat Stand, or the Yoke and Sled, or the Utility Flat Bench, or many parts and pre-set configurations of the XRIG™ series, that may be employed to bear tough workouts or quite heavy body-weights, such as the ones of the Strongmen. Due to those reasons, all mentioned items have been also drawn bigger and stronger: they have been drawn in order to comply with the serious overloading tests performed on to all the products that aim to belong to the MAGNUM™ series. All products made to belong to the MAGNUM™ series are made with an industrial grade of steel tubes. All square

steel tubes are bigger in size - switched from the standard 6x6 cm. to the oversized 8x8 cm. - and in thickness – switched from the standard 10 Gauge (3 mm.) or 11 Gauge (3.5 mm) to the oversized 8 Gauge (4.2 mm.).

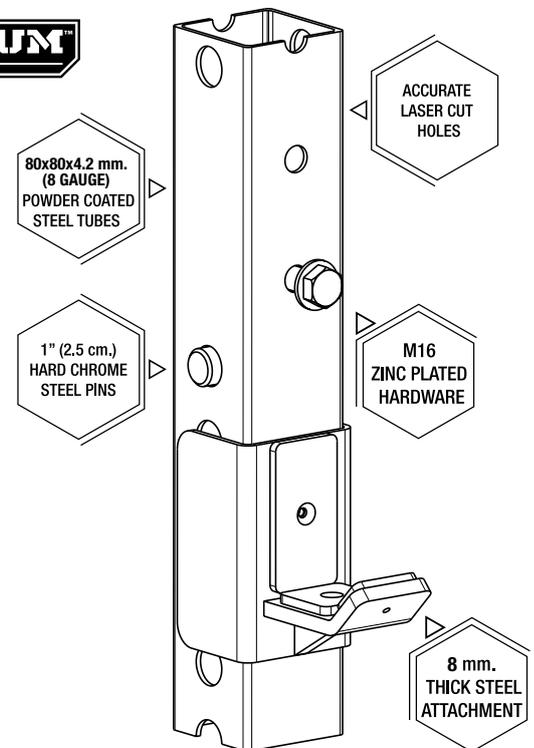

All MAGNUM™ series products are welded by using a special certified kind of welding-robots, commonly involved with the construction of industrial machines like big cranes.

All Steel plates and sheets used to manufacture the MAGNUM™ products are thicker than the standard ones. Furthermore, the MAGNUM™ products are tested in order to bear heavier weights: three times higher than their “younger” brothers. E.G.: a Magnum Squat Stand is tested to bear up to 1500 Kg. so we can say it is almost unbreakable.

Xenios USA®

Xenios USA®

All MAGNUM™ products parts are made by using industrial grade steel tubes so to really be ready to bear “oversized” workouts. The steel used to make the MAGNUM™ tubes is normally employed in industrial machine constructions, such as the building cranes. All square tubes are 8x8 cm. sized and 4.2 mm. thickness (8 Gauges), while all the round tubes are 32 mm. diameter by 4 mm. thickness. All steel plates and brackets are made using no-lower than 8 mm. thickness steel sheets. All main steel parts are bolted together just by using M16 bolts, coupled with M16 self-locking nuts: up to 300 Nm in tightening strength. All bolts feature safety pvc end-caps so to avoid any chance of injury with the offset of the same bolts out of the nuts after being tightened. All hardware is zinc plated so to be rust-proof.

⚠ All Xenios USA® bars are not pre-equipped with collars.

GROOVED SLEEVES FOR EXTRA PLATES' GRIP

*1 COMPETITION AND PROFESSIONAL BARS Lifetime Warranty covers just bar's shaft breakages. Bar's shaft bents warranty is just 1 year time limited.

Bar's shaft breakages and/or bents warranty main terms: it is valid just when COMPETITION and/or PROFESSIONAL bars are used on a professional weightlifting platform (such as the Xenios USA® one) or equivalent kind of flooring, and loaded with the Xenios USA® rubber Bumper Plates or equivalent quality.

2 Year: on to all bar and sleeves construction parts.

1 Year: on to all bar and sleeves finishing. Rust due to proven missing maintenance and cleaning or misuse (e.g.: due to storage on to bare steel racks) is not covered under warranty.

All Warranties on COMPETITION and PROFESSIONAL bars are void in case of negligent or faulty use, alteration, maintenance, storage or handling by the user. Negligent or faulty use includes abusive dropping of the bar (i.e., dropping the bar on to a not proper floor (10 mm. thick rubber flooring and lower are considered not proper), a box, bench, spotter arms or pins in a power rack, excessive dropping with insufficient or damaged bumpers, or dropping with iron plates, and similar usage). For any further about Xenios USA® products' warranty, please refer to the Xenios USA® Warranty Chart, available at www.xeniosusa.com

WE REALLY CONCERN ABOUT SAFETY

The XRIG™ series was born to provide a never-ending range of items thought to build-up any kind of Crossfit® station. Besides all the pre-set configurations drawn by our R&D Dept., customers could be able to choose among dozens of parts and options so to really have their own station. When a customer gets in touch with our sales team and he needs to be assisted with the drawing of his own station, our XRIG™ team of product's designers draw the station according to customer's needs and provide to him the final 3D drawing with all the main specs and sizes. This process helps the customers to have either a bespoke product and a safe station, cause any customer's sketch, is first switched in to a 3D drawing and then checked by the product designers also for what concern the safety and the stability of all the parts once bolted together.

Thanks to our in-house tech department, all needs can be matched: custom sizes, custom colors etc..

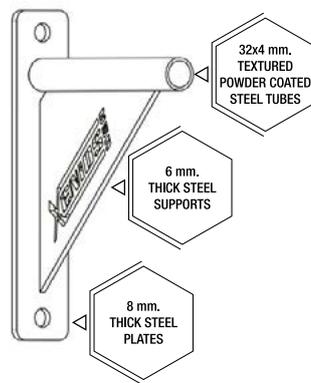

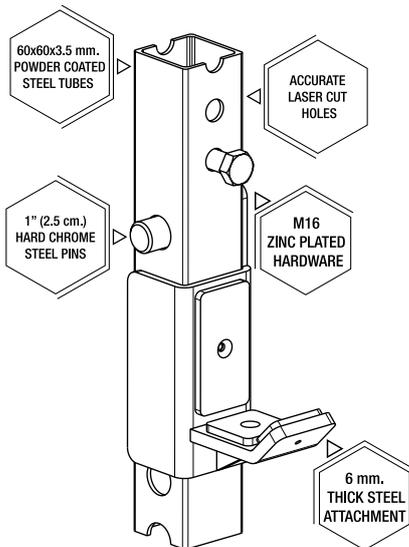

TUV-SUD: most of our products (such as benches, racks, Crossfit® stations etc..) are tested and certified by the TUV-SUD®, that is one of the worldwide most affordable product testing company. All products are tested in order to comply with the latest products safety regulations (E.G: in Europe the EN-ISO 20957-1, EN-ISO 957-2 and EN-ISO 957-4)*. All along the catalogue we have mentioned which products are tested according to TUV-SUD® safety specs.

We furthermore care about the safety of the electronic products we carry. Either for the Xenios USA® items and for any third-brand product, we make sure they feature all needed certification, such as, for example, the CE and the ROHS ones*

In order to make really reliable products, we also concern about safety and quality certifications of raw materials (such as, for example, the steel tubes used to make the whole XRIG™ range of items), painting and coating materials and processes, hardware, welding process and welder's certified skills. A product making process involve dozens of matters, from raw materials selection up to the packaging of the finished goods, and our R&D and Product Team is just formed by experienced technicians and engineers that can let us be proud to label a workout tool with our logo.

**Some of the mentioned products' safety regulations and/or safety marks may not be valid for some Countries.*

STEEL TUBES All XRIG™ parts are made by using stiff steel tubes so to really be ready to bear severe workouts made by several athletes at a time. The steel used to make the tubes is just the S235J steel (UNI-EN 10219-2 compliance*) , one of the strongest on the market. All square tubes are 6x6 cm. sized and 3.5 mm. thickness (11+ gauges), while all the round tubes are 32 mm. diameter by 4 mm. thickness. All main steel parts are bolted together just by using M16 bolts, coupled with M16 self-locking nuts: up to 300 Nm in tightening strength. All bolts feature safety pvc end-caps so to avoid any chance of injury with the offset of the same bolts out of the nuts after being tightened. All hardware is zinc plated so to be rust-proof.

WELDING All steel parts are welded just by robot and robots are managed just by skilled certified workers, so to have a consistent welding line all-around the tubes' junctions. Moreover, all holes for bolts and for snap-in / snap-off options are drilled by laser so to be really accurate in diameter and position.

COATING The standard color of the whole XRIG™ range is the special Xenios USA® XRIG™ Black powder coating. After several tests on the mix of the powder and the coating/drying process, we have found the way to have an high-bonding ratio kind of coating that features a special texture on its surface (once dried), so to provide the right grip for harmless and firmly Muscle-Ups. The special Xenios USA® powder coating is furthermore made by adding to the formula a slightly percentage of wax that makes the coating almost scratch-proof. All steel parts are not less than 60 micron coated.

Wherever there are bare steel components (such as pins, poles, or junctions), we protect them just by using the industrial galvanizing process called Hard Chrome.

CrossFit® is a registered trademark of Crossfit Inc.(USA). The Xenios USA company and registered trademarks are not affiliated and/or associated with and/or endorsed and/or sponsored by Crossfit Inc. The Xenios USA products and services are not endorsed, tested, sponsored by and/or associated with Crossfit Inc. and/or with any of the registered trademarks, products and services of Crossfit Inc.

The XRIG™ series can be also manufactured following the really heavy duty features of the MAGNUM™ range of products. Thought for those who really need to face severe workout, the MAGNUM™ series is a kind of tank-like range of products that can be never-ending overloaded.

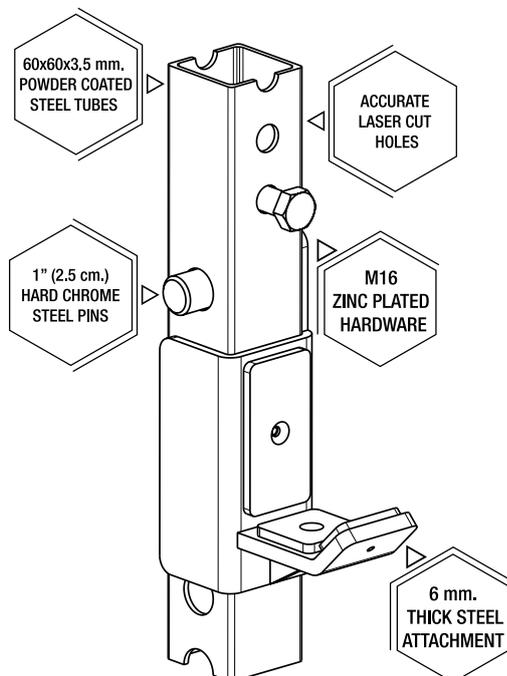

At Xenios USA® we have thought to the best way to let some products be also manufactured following a kind of next-level bill of specifications. There are some workout tools, such as the Squat Stand, or the Yoke and Sled, or the Utility Flat Bench, or many parts and pre-set configurations of the XRIG™ series, that may be employed to bear tough workouts or quite heavy body-weights, such as the ones of the Strongmen. Due to those reasons, all mentioned items have been also drawn bigger and stronger: they have been drawn in order to comply with the serious overloading tests performed on to all the products that aim to belong to the MAGNUM™ series. All products made to belong to the MAGNUM™ series are made with an industrial grade of steel tubes. All square

steel tubes are bigger in size - switched from the standard 6x6 cm. to the oversized 8x8 cm. - and in thickness – switched from the standard 10 Gauge (3 mm.) or 11 Gauge (3.5 mm) to the oversized 8 Gauge (4.2 mm.).

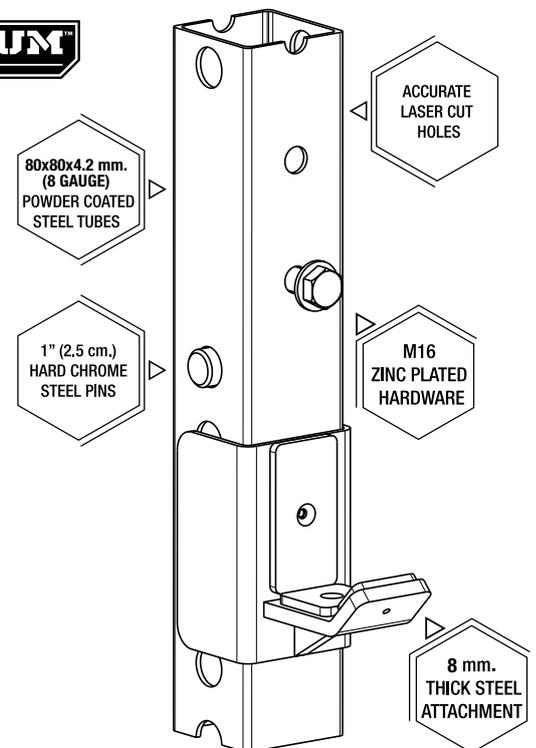

All MAGNUM™ series products are welded by using a special certified kind of welding-robots, commonly involved with the construction of industrial machines like big cranes.

All Steel plates and sheets used to manufacture the MAGNUM™ products are thicker than the standard ones. Furthermore, the MAGNUM™ products are tested in order to bear heavier weights: three times higher than their “younger” brothers. E.G.: a Magnum Squat Stand is tested to bear up to 1500 Kg. so we can say it is almost unbreakable.

Xenios USA®

Xenios USA®

All MAGNUM™ products parts are made by using industrial grade steel tubes so to really be ready to bear “oversized” workouts. The steel used to make the MAGNUM tubes is normally employed in industrial machine constructions, such as the building cranes. All square tubes are 8x8 cm. sized and 4.2 mm. thickness (8 Gauges), while all the round tubes are 32 mm. diameter by 4 mm. thickness. All steel plates and brackets are made using no-lower than 8 mm. thickness steel sheets. All main steel parts are bolted together just by using M16 bolts, coupled with M16 self-locking nuts: up to 300 Nm in tightening strength. All bolts feature safety pvc end-caps so to avoid any chance of injury with the offset of the same bolts out of the nuts after being tightened. All hardware is zinc plated so to be rust-proof.

AVAILABLE ON DEMAND

OUTDOOR PROOF

Once we have started to develop our XRIG™ range of products, our R&D team has also thought to those who need to set a station up, out of the door of their Box and, even worse, without sheltering it. So, that is one of the reason cause we are one of the few makers on the market to be able to provide all the XRIG™ parts made with a special treatment for elements protection. When an XRIG™ station is made to be outdoor installed, all steel components are first zinc-plated (our zinc-plating process are all certified in accordance with the UNI-EN ISO 1461:2009 regulation*) and then powder coated with an upgraded kind of powder coating. This special process, along with special water-draining holes drilled on to the main Uprights of the station, makes it totally rust-proof and so ready to bear the elements' power. **

CUSTOM COLORS Even though the standard color of the XRIG™ parts is the above mentioned Xenios USA® XRIG™ Black one, customers can have the chance to choose their own color for the whole station or even for some of the parts it is made of (such as, for example, the uprights). All available colors feature the same specs of the standard XRIG™ Black of Xenios USA®, especially for what concern the unique light-textured surface that gives to the pull-up bars the perfect grip for the muscle-ups. **

TEXTURED SURFACE COLORS

CUSTOM SIZE

Since we are the original maker of the XRIG™ range and since we think customers' needs can't really be all foreseen in advance, an XRIG™ station can be also drawn with totally bespoke parts. Should you need, for example, taller uprights or shorter pull-up bars, or anything "crazy" you may have invented, at Xenios USA® we will match your requirements by even drawing from the scratches your unique parts. **

XRIG™ WARRANTY

All XRIG™ steel parts in case of steel breakages and/or welding breakages.

All Outdoor Proof XRIG™ steel parts in case of rust-spots arising from coating and in case of steel corrosion-perforation.

All XRIG™ steel parts in case of rust-spots arising from coating. All XRIG™ Hardware and other components.

Warranty will void in case of outdoor use, unless the XRIG™ items were made with the special Xenios USA® "Outdoor Proof Treatment". Warranty against rust never covers rust rising on scratched and/or worn-by-the-use and/or speal-made parts steel areas. Bear steel due to scratches and/or dents can get rust unless not coated and/or retouched again. For any further about Xenios USA® products' warranty, please refer to the Xenios USA® Warranty Chart, available at www.xeniosusa.com

***Attention: CUSTOM COLOR, CUSTOM SIZES and OUTDOOR PROOF are priced options. Ask to the Xenios USA® Team to learn more about them.*

- Material: Powder coated steel - Color: Matte black
- Steel tubes size: 60x60x3.5 mm. + 32x4 mm round tubes.
- Pull-Up heights: 6'10"-7'6"-8'3" (only w/12' Uprights)

VSFXFIT05MS XRIG™ - 4' Basic Pull-Up frame (104 cm.) - M.S. (to be used with Magnum Series Rack)

WEIGHT (Kg./Lbs)	L (cm.)	W (cm.)	H (cm.)
13 / 29	104	6	48

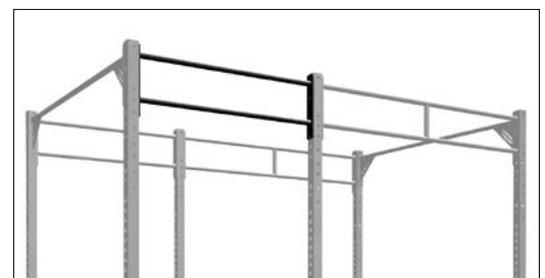

- Material: Powder coated steel - Color: Matte black
- Steel tubes size: 60x60x3.5 mm. + 32x4 mm round tubes.
- Pull-Up heights: 6'10"-7'6"-8'3" (only w/12' Uprights)

VSFXFIT22 XRIG™ - 4' Pull-Up Double-Crossmember

WEIGHT (Kg./Lbs)	L (cm.)	W (cm.)	H (cm.)
9 / 20	108	6	38

- Material: Powder coated steel - Color: Matte black
- Steel tubes size: 32x4 mm round tubes.
- Pull-Up heights: 6'10"-7'6"-8'3" (only w/12' Uprights)

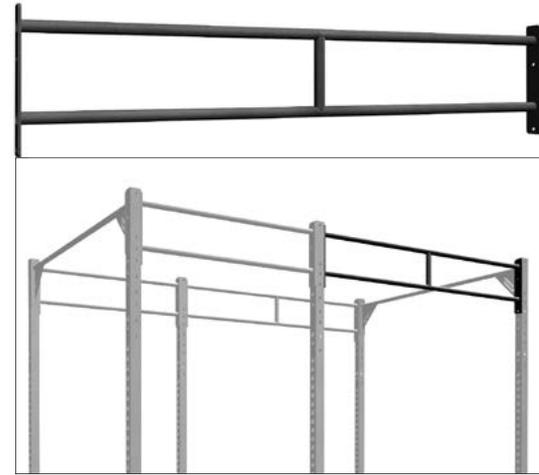

XRIG™ - PARTS AND OPTIONS

VSFXFIT23 XRIG™ - 6' Pull-Up Double-Crossmember

WEIGHT (Kg./Lbs)	L (cm.)	W (cm.)	H (cm.)
12 / 26.5	168	6	38

- Material: Powder coated steel - Color: Matte black
 - Steel tubes size: 32x4 mm round tubes.

- Pull-Up heights: 6'10"-7'6"-8'3" (only w/12' Uprights)

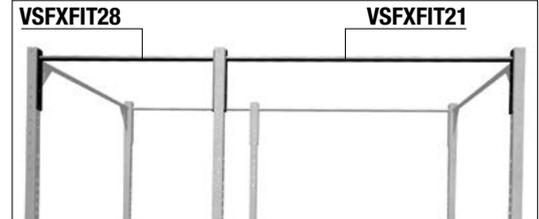

VSFXFIT28 XRIG™ - 4' Muscle-Up Bar

WEIGHT (Kg./Lbs)	L (cm.)	W (cm.)	H (cm.)
5 / 11	108	6	37

- Material: Powder coated steel - Color: Matte black
 - Steel tubes size: 32x4 mm round tubes.

- Pull-Up heights: 7'6"-8'-8'8"-9'5" (only w/12' Uprights)

- Available also with the smoother speal finishing, for perfect muscle-ups (VSFXFIT36)

VSFXFIT21 XRIG™ - 6' Muscle-Up Bar

WEIGHT (Kg./Lbs)	L (cm.)	W (cm.)	H (cm.)
6.5 / 14	168	6	37

- Material: Powder coated steel - Color: Matte black
 - Steel tubes size: 32x4 mm round tubes.

- Pull-Up heights: 7'6"-8'-8'8"-9'5" (only w/12' Uprights)

- Available also with the smoother speal finishing, for perfect muscle-ups (VSFXFIT37)

VSFXFIT28MS XRIG™ - 4' Muscle-Up Bar (104 cm.) - M.S. (to be used with Magnum Series Rack)

WEIGHT (Kg./Lbs)	L (cm.)	W (cm.)	H (cm.)
5 / 11	104	6	37

- Material: Powder coated steel - Color: Matte black
 - Steel tubes size: 32x4 mm round tubes.

- Pull-Up heights: 7'6"-8'-8'8"-9'5" (only w/12' Uprights)

- Available also with the smoother speal finishing, for perfect muscle-ups (VSFXFIT36)

VSFXFIT36 XRIG™ - 4' Muscle-Up Bar w/Speal Finishing

WEIGHT (Kg./Lbs)	L (cm.)	W (cm.)	H (cm.)
5 / 11	108	6	37

- Material: Powder coated steel - Color: Matte black - speal
 - Steel tubes size: 32x4 mm round tubes.

- Pull-Up heights: 7'6"-8'-8'8"-9'5" (only w/12' Uprights)

⚠ Speal steel bar may early get rusted. Frequently maintenance is duly required.

VSFXFIT37 XRIG™ - 6' Muscle-Up Bar w/Speal Finishing

WEIGHT (Kg./Lbs)	L (cm.)	W (cm.)	H (cm.)
6.5 / 14	168	6	37

- Material: Powder coated steel - Color: Matte black - speal
 - Steel tubes size: 32x4 mm round tubes.

- Pull-Up heights: 7'6"-8'-8'8"-9'5" (only w/12' Uprights)

⚠ Speal steel bar may early get rusted. Frequently maintenance is duly required.

XENIOS USA WARRANTY

Thanks for choosing a Xenios USA product!

Xenios USA® products, except for what mentioned in written for some special items*, carry a limited two years warranty against breakages and damages, just for the original owner (who need to prove his status by having the original purchase document). Xenios USA® warranty's rights are not transferable. Xenios USA® warranty time-frame starts from the date of purchase of each product. As stated on to the original purchase document.

Xenios USA® products carry a limited 30 days warranty against evident by-factory manufacturing defects, for the original owner. Should any defects be present on items' delivery, due to problems occurred during shipment, evidenced by a damaged and/or mishandled packaging, warranty will be effective just if the delivery was checked and accepted by the recipient by following the goods-checking rules. The delivery and goods-checking rules sheet is always attached to the shipped parcel/s. A copy of the same can be anyway downloaded from our website: www.xeniosusa.com

Xenios USA® warranty doesn't provide to the customers any product returning right but in case of evident breakages and/or damages of the same. Any product returning policy will be stated and ruled by each Xenios USA® Dealer and/or Re-seller according to his own Country Laws and Regulations about the consumers' rights care.

Xenios USA LLC or one of its International Licensers, Agents and/or Dealers (local and/or international), in case of any warranty intervention, will repair or replace the damaged and/or broken items, previously returned by the customers, at their own, so to be inspected by Xenios USA LLC or one of his International Licensers, Agents and/or Dealers (local and/or international), in order to evaluate the validity of the warranty terms. Xenios USA LLC, its International Licensers, Agents and/or Dealers will not be bound by further purchaser's own Country laws and regulations on products' warranty, unless they are issued by the same Country from where goods are invoiced and/or shipped.

Xenios USA® products are not guaranteed against any kind of damage and/or breakage and/or consequence, resulting from an improper use and/or a misuse, and/or a mishandling, misapplication, alteration or modification, and/or abuse of them and/or a shortage of care and maintenance (Please refer also to the "Safety and Usage Guide" and "Care and Maintenance Guide" for the Xenios USA® products. Both can be downloaded from our website www.xeniosusa.com). Xenios USA® Warranty will not cover any damage occurred to properties and/or persons and/or animals, during the assembling and/or installing procedures of the Xenios USA® products (made by the users) and/or while they are used. Any Xenios USA® product carry its own User and Assembly Manual (where required by the kind of the item), along with the Warranty Card, where special warranties about the assembling, installing and use of the same product are mentioned on. The Xenios USA® products are training tools and they need to be used for such purpose. They are not a toy and so children should always use the same being looked after by adults. Xenios USA® always recommend to use any workout tools under the guide of expert trainers and just by keep being checked-up by a physician on a regular basis.

Xenios USA® warranty doesn't cover the considered standard wear consequences, (as mere example: chipping or fading out of painting and/or colors and/or chrome-finishing is considered normal wear by the use).

Xenios USA® warranty validity is always subjected to the previous inspection of the damaged and/or broken products, by Xenios USA LLC or one of his International Licensers, Agents and/or Dealers. Xenios USA® Warranty doesn't cover costs of removal and/or transportation for the Xenios USA® products sent by the customers to be inspected (just when needed).

In case of any failure or breakage of any Xenios USA® product, which may be covered under warranty, a formal warranty claim should be submitted to Xenios USA LLC, through the warranty form, at www.xeniosusa.com or directly at one of the Xenios USA® international Licensers, Agents and/or Dealers from where the product was bought.

Xenios USA LLC reserves the right to make changes on the design and/or materials and/or features and/or sizes of any Xenios USA® product, without any formal notice. Xenios USA® warranty will not cover any claim for products' specs and/or feature and/or outlook differences compare with the ones published on to any Xenios USA® marketing mean.

The here above Warranty rules are not applicable to the Dealers and Re-sellers purchases that will be ruled by the relevant Laws and regulations about wholesalers' business kind.

CARE, MAINTENANCE, SAFETY AND USAGE

All Xenios USA® products must be periodically inspected and maintained for longer lifespan, to avoid any kind of earlier wearing and to make sure products keep being safe for users. For a proper care of all the Xenios USA® products, please refer to our web site, www.xeniosusa.com, where all the care and maintenance guides can be downloaded from. Warranty will void in case of unproper care and maintenance of Xenios USA® products. Xenios USA® recommends to follow all safety and usage instructions before to use any Xenios USA® product. Safety and usage guides can be downloaded at www.xeniosusa.com. Any Xenios USA® product carry a user and assembly manual (when required by the kind of the item), along with a warranty cards. Xenios USA LLC recommends/to carefully read them before to install, assembly and use any product.

A daily basis inspection and maintenance of the Xenios USA® products will let them last longer and it will also avoid any kind of damage and/or personal injury by using them. Xenios USA LLC or his international licensers, agents and/or dealer will not be responsible for any kind of damage and/or personal injuries caused by the use of a careless or maintenance-less product.

Xenios USA® reserves the right to change product design, construction materials and specifications at any time without notice. While every effort has been made to ensure that all graphic representations and descriptions of goods available from Xenios USA® correspond to the actual goods, Xenios USA® and/or its dealers and/or its international agents are not responsible for any variations from these descriptions. Error & omissions excepted. Some of the products could not be available within all countries.
